Their FCA register number is 110397.

Nucleus Financial Services Limited is authorised and regulated by the Financial Conduct Authority (FCA), firm reference number 456117.

Date of Production of this KID: 16 November 2018

What is this product?

Type

This product is a whole of life unit linked life assurance policy, issued by Sanlam Life & Pensions UK Limited (SLP).

Objective and intended retail investor

The product aims to provide growth on your investment over the medium to long term, preferably five years or more, through a life assurance policy that offers the potential to defer higher and additional rate tax on income and growth. It provides the option of cash withdrawals and will pay a cash sum on the death of a life assured.

It is aimed at investors who typically; require tax efficient withdrawals; are active investors and wish to avoid triggering a personal tax charge during the term of the investment; are higher rate or additional rate taxpayers who expect to become basic rate taxpayers when the product is surrendered (e.g. on retirement) or who are able to assign it to a basic rate tax payer (e.g. a spouse) prior to surrender; or wish to mitigate the effects of inheritance tax by taking advantage of specialised trust arrangements.

The product offers a wide range of underlying investments options which will be selected by you and your adviser. The assets must be permitted investments, and include UK OEICs, unit trusts, investment trusts and recognised overseas OEICs and SICAVs. Some underlying investment options may occasionally have holdings periods greater than five years.

Information on the underlying investments are available from your adviser.

Insurance benefits

SLP provides a death benefit of 100.1% of the value of the product after the deductions of charges, using unit prices applicable on the date following the day of receipt of written notification of the death of the life assured.

Maturity

While the product is open ended in that it has no fixed maturity, it will end on the death of the life assured on whose death a benefit becomes payable. Where there is more than one life assured the death benefit is payable either on the death of the first or last life assured.

Key Information Document (KID)

What are the risks and what could I get in return?

Risk indicator

The Nucleus Onshore Bond offers a range of underlying investment options with the risk classes ranging from one as the lowest and six as the highest. The risk and return of the investment varies depending on the underlying investment options.

The risk indicator shown above is not guaranteed to remain unchanged and may change over time.

Information on the underlying investments are available from your adviser.

This product does not include any protection from future market performance. However you invest your money, there's always going to be an element of risk connected with it; whether that is erosion in real terms against inflation or loss of value as a result of a change in the markets. The benefits you receive will depend on investment performance. The value of investments can fall as well as rise and you may not get back the amount originally invested. Your capital is at risk and you may lose some or all of your money. The performance of funds holding assets denominated in foreign currency will also be subject to variation in currency rates.

It is important that you and your adviser properly understand your appetite for risk and capacity for financial loss so that you can build a tailored risk strategy; suited specifically to your needs.

What happens if the issuer of the Nucleus Onshore Bond is unable to pay out?

The Financial Services Compensation Scheme (FSCS) covers the Nucleus Onshore Bond. If SLP (as issuer of the product) cannot meet their obligations you will be entitled to compensation from the FSCS which currently provides cover for 100% of the claim, with no upper limit.

If an operator of an underlying investment fund was declared in default SLP could not make a claim against the FSCS on your behalf. This is because the investments are held in SLP's name and SLP would not be an eligible claimant. In these circumstances it may not be possible to claim under the FSCS. However, the underlying investments will be held by a custodian (i.e. ring-fenced) this means these assets are not the operator's and would therefore be protected from creditors.

What are the costs?

The following provides information about the costs and shows the impact that all costs will have on your investment over time. We have taken these from the minimum and maximum costs of investments available to be held within a bond.

Table 1. Costs over time

Investment scenarios payment of £10,000	If you cash in after 1 year	If you cash in after 2.5 years	If you cash in after 5 years	If you cash in after 10 years
Minimum				
Total costs	£40	£120	£200	£600
Impact on return (RIY) per year	0.47%	0.47%	0.47%	0.47%
Maximum (performance fees excluded)				
Total costs	£1,810	£3,300	£5,600	£10,200
Impact on return (RIY) per year	18.1%	13.8%	12.3%	11.6%

Table 2. Composition of costs

The table below shows:

- the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;
- the meaning of the different cost categories.

This table shows the impact on return per year			
One-off costs	Entry costs	Range 0.0% to 5.00%	The impact of the costs you pay when entering your investment.
	Exit costs	Range 0.0% to 3.00%	The impact of the costs of exiting your investment when it matures or you sell it.
Ongoing costs	Portfolio transaction costs	Range 0.0%* to 5.05%	The impact of the costs buying and selling underlying investments for the product. *we have excluded any negative costs which may arise (these are anomalies based on the methodologies used, and do not actually reflect true costs)
	Other ongoing costs	Range 0.0% to 5.95%	The impact of the costs taken each year for managing your investments.
Incidental costs	Performance fees	Range 0.00% to 3.45%	The impact of the performance fee. These are taken from your investment if the product outperforms its benchmark.
	Carried interests	0%	The impact of carried interests.

Your adviser may charge you other costs and will need to provide you with these and show you the impact they will have on your investment over time.

Key Information Document (KID)

A dilution levy may be charged on the underlying funds or some of the underlying funds may operate a swinging price. These are applied to purchase and redemptions of shares to protect the remaining investors against the costs incurred by the fund in buying or redeeming its investments. A dilution levy or swing price may be applied where the fund is experiencing large levels of net purchases/redemptions and on 'large deals'.

Some of the underlying funds may operate a dual price. In this case, there are two prices for the fund in question each day – a higher price to buy units (the 'offer' price) and a lower price to sell units (the 'bid' price). The difference between the prices is called the 'spread'. The spread is separate to the costs in the above table.

Information on the underlying investments are available from your adviser.

In addition to this KID, you will receive a personalised key features illustration which will include details of platform charges, investment charges and any fees payable to your adviser.

How long should I hold it and can I take my money out early?

Recommended holding period

5 years

This product has no required minimum holding period but is designed for medium to long term investment; you should be prepared to stay invested for at least five years. There is no maximum holding period.

Medium term investments balance risk and return, being more conservative than longer term investment, but more risk tolerant than shorter-term options. It is expected that investors can afford to ride out some market volatility and need to protect their investments against inflation.

You may withdraw some or all of your money from this product, free of charge, at any stage by notifying Nucleus Financial Services Ltd. While there may be no product charges applied, withdrawing money may lead to a personal income tax liability depending on your circumstances.

If you withdraw money from your product you may not be able to get back the full amounts you invested at the outset. You should also be aware that withdrawals will have an impact on future potential investment growth, especially within the recommended holding period.

How can I complain?

If you wish to complain about any aspect of the Nucleus Onshore Bond you can register your complaint with us in any of the following ways:

- You can contact our complaints team on 0131 226 9535 who will log your complaint and explain what to do.
- You may log your complaint via our website nucleusfinancial.com
- You may send your complaint via email to aileen.heggy@nucleusfinancial.com or in writing to the Complaints manager, Nucleus HQ, Greenside, 12 Blenheim Place, Edinburgh EH7 5JH. Any complaint about the investment advice which you have received should be made, in the first instance, to the firm which gave the advice. Please note that Nucleus Financial Services Limited is unable to provide specific advice about the suitability of any of its products for individual customers.

On receipt of your complaint you will receive a letter acknowledging your complaint together with a note of Nucleus' complaints procedure.

If your complaint is not dealt with to your satisfaction you should contact the Financial Ombudsmen Service in writing to Exchange Tower, London, E14 9SR or by telephoning 0300 123 9123. Any such action will not affect your right to take legal action.
